## PROFILE

Software engineer focused on backend development interested on building clean, maintainable, scalable, and extensible software.

Currently, my greatest interest lies in distributed systems development, although I am interested in all areas of development. I particularly value a good CI/CD infrastructure

## RELEVANT EXPERIENCE

- SEP 2024 – PRESENT** **TRACEABILITY APPLICATION FOR THE FOOD INDUSTRY**  
**Freelance**
  - Implemented features for batch registration, tracking of incoming and outgoing goods, and generating reports for health inspections.
  - Frontend: Angular, typescript.
  - Backend: Java Springboot, Spring Batch
  - Databases: S3 and Postgresql hosted on AWS
- NOV 2022 – SEP 2023** **BACKEND JAVA DEVELOPER**  
**Vexcel Imagin**

  - Develop and maintainance of **API Rest** endpoints using **Java**.
  - Use of **Postman** for doing requests.
  - Testing services using **JUnit** and **Cucumber**.
  - Document API endpoints using **OpenAPI**
  - Monitoring services with **Datadog**.
  - Handle customer tickets through **Jira**.

## PROJECTS

- PAUSED** **SPRING BOOT/ANGULAR SAAS PROJECT**

  - SaaS microservices** project build from frontend to hosting.
  - Backend: **Spring boot** stack, postgresSQL, RabbitMq, AWS.
  - Frontend: **angular**, astro.
  - Infrastructure: Jenkins, **docker**, Nginx.
  - Project goal focuses on research and personal development.
- ON DEVELOPMENT** **HOMELAB PROJECT**
  - Project goal focuses on mastering system and network management as upgrading devops knowlage.

## TECH SKILLS

- **Java, Java Spring Boot...**
- **MySQL/ Postgresql**
- **Git**
- **AWS**
- **HTML/ CSS/ JavaScript**
- **Angular**
- **Microservices**
- **Jenkins**
- **Docker**
- **Nginx**
- **RabbitMq**
- **Proxmox**

## LANGUAJES

- Spanish (native)
- English (intermediate -B2)
